

surveying/engineering

insurance

Richard Jackson Ltd provide surveying and engineering services to the insurance sector in relation to a wide range of claims. These services are supported by qualified claims handlers to ensure our involvement in each claim is concluded to the satisfaction of both the insurers and the insured.

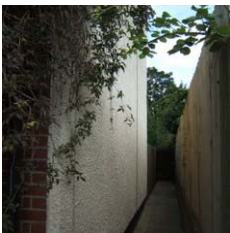

pre-purchase

Richard Jackson Ltd are able to undertake structural surveys of properties and to provide reports specifically tailored for their purchase/sale. The reports may be used in support of funding applications and used to assist in the valuation process, or simply to consider the structural condition of the property.

concrete

We undertake specialist concrete surveys to investigate the reason for deterioration or to simply establish its condition. The surveys incorporate site and laboratory testing as appropriate to allow the objective to be met. Following the survey we are able to recommend remedial works to ensure the continued longevity of the structure.

party wall

Richard Jackson Ltd have specifically qualified surveyors who are able to provide services in connection with the Party Wall etc Act. We act for individuals who are proposing to undertake works to which the Act applies or for those who have an interest in a wall affected by the proposals of others. We also act as third surveyors should dispute arise.

boundary disputes

We provide services in connection with boundary disputes, preparing reports following the undertaking of site surveys and desk based research to assist in the establishing of boundary positions. The reports provided are prepared such that they may be used in court if necessary, and where expert evidence may also be given.

condition surveys

Richard Jackson Ltd undertake condition surveys of all types of building, from domestic houses to commercial premises, advising on both the condition of the building and its external areas/services. The reports that are prepared may be used to develop maintenance plans, or if significant defects are found, be developed into appropriate work schedules.
